

Adding Your Branding to Bake Xpress

Exterior

It's easy to brand the machine so that it is an extension of your brick-and-mortar store. We can provide design templates for your designers to provide to local vinyl wrap installers. Or, send your design elements to us, and we can create a design and wrap the machine prior to delivery.

Touchscreen

The 55" touchscreen has two customizable areas above and below the ordering strip. Using the LBX software, you will be able to interface with the machine to add graphics, video content, or advertising to those areas.

Menu

The onscreen menu will be populated with photos and names of your products, which you load into the LBX software. When the barcode scanner scans the items you've loaded into the machine, it will automatically populate the onscreen menu with your pre-set photos, product names, descriptions, and nutrition information.

A Perfect Bake, Every Time

Bake Xpress features a combination smart oven that uses microwave and convection for even heating and infrared to provide the finishing touches like crispy crust, flaky pastry, or bubbly browned cheese. Using either the LBX software or the on-screen interface, you can select heating technology and adjust times until you achieve the results you want.

That custom baking profile is then communicated to the machine at time of order via the barcode on the food's box. You can adjust the profile at any time via the on-screen interface or via the LBX software.

Bake Xpress works hard so you don't have to

The technology inside Bake Xpress makes it easy for you to monitor and manage your machines. When you load each machine, it scans the barcodes and populates the onscreen menu as well as the remote monitoring software. Within the LBX software, you'll be able to keep tabs on inventory levels and machine operation in real time, as well as generate reports on sales over time. If something expires, Bake Xpress will remove it from the menu, and let you know so you can remove it the next time you load the machine. It's that easy!

It's the easiest way to grow your business!
