# Meet Bake Xpress

## Serving Freshly-Baked Food 24/7

Bake Xpress gives you the ability to provide a full menu of meals and pastries around the clock in a compact vending solution. With the perfect combination of infrared, convection, and microwave, your customers will enjoy flaky pastries, steaming pasta meals, or hot crispycrust pizza, all with a unique high-tech flair.

Bake Xpress' integrated intelligence and combination smart oven are uniquely able to replicate the traditional in-store bakery or café experience. The menu can easily be changed at any time. Just set the heating technology and times once, and the custom baking profile of each item is communicated to the smart oven at time of order. You can even offer chilled foods like fruit plates or garden salads. The possibilities are unlimited!

## A Look Inside Bake Xpress

**Refrigerated Storage** with space for 68-104 items

Carousel with adjustable shelves

Barcode

Food in barcoded boxes

freshly-baked food

opens to deliver

Door

Tracks status to on-screen ordering and remote tracking software and communicates custom baking profile to oven

Robotic Arm

delivers food to oven

selects item, scans barcode, and

Combination Smart Oven calibrated for each food item with ideal settings for microwave, convection, and infrared timing and temperatures to perfectly

heat and crisp.

### Software Suite

You'll be able to monitor Bake Xpress remotely using our cloud-based

software, which keeps you up to date on inventory and machine operation.

You also can generate sales reports to illustrate trends and patterns that will help you maximize your sales. If an item expires, Bake Xpress will remove it from the menu, and let you know so you can replace it the next time you load the machine. It's that easy!

## White Labeling

Bake Xpress can be fully customized. Apply your own branding to the exterior, use your own video content and food, and

you can add locations or extend open hours for a fraction of the cost of opening and staffing a traditional brick-andmortar cafe.

Want to add your own products? No problem!

Simply capture the

smart oven settings via the on-screen or remote software and assign the new profile to each item via the barcode.

## Ideal for High-Traffic 24/7 Locations
