

# MEET BAKE XPRESS

Compact Size

Standard 220 V Connection

55" Touchscreen

Combination Smart Oven

Integrated NAYAX Payment

On-screen Ordering

## Serving Fresh, Hot Food 24/7

Bake Xpress gives you the ability to provide freshly baked meals and pastries around the clock, with a full menu including baked goods, pasta, and even chilled foods like salads.

Bake Xpress' integrated intelligence and combination smart oven are uniquely able to replicate the traditional in-store bakery or cafe experience. The menu is virtually unlimited and can easily be changed at any time. Just set the oven times and temperatures once, and the custom baking profile of each item is communicated to smart oven at time of order. With the perfect combination of microwave and convection for even heating and infrared for crisping, your customers will enjoy flaky pastries, steaming pasta meals, hot pizza with a crispy crust, or a garden salad, all with a unique high-tech flair.

FOOD ROBOTICS

# A Look Inside Bake Xpress

## White Labeling

Want to add your bakery's own products? No problem! Simply adjust and capture the precise oven settings via the on-screen or remote software and assign the new profile to your items via barcode. LBX Food Robotics can even white label your machine so that you can apply your own branding to the exterior! You can add locations or extend open hours for a fraction the cost of opening and staffing a traditional brick-and-mortar cafe.

## Ideal for High-Traffic 24/7 Locations

-  Hotels
-  Universities
-  Offices
-  Retail Sites
-  Transportation Hubs
-  Manufacturing Facilities
-  Hospitals
-  Stadiums
